Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (e). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Applicant's election of claim 4 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Trauernicht (US 4,414,437).

Regarding claim 4, Trauernicht teaches a loudspeaker comprising: a diaphragm (5); a magnet assembly defining a cylindrically-shaped flux gap(shown); an inner (9) and outer(7) sleeve disposed within the flux gap; and a coil (8) disposed within the flux gap between the inner(9) and outer (7) sleeves. Trauernicht teaches that the outer sleeve (7) is an aluminum foil and therefore teaches that the outer sleeve is thermally conductive metal. Trauernicht does not clearly teach

Art Unit: 2643

that the inner sleeve (9) is also thermally conductive metal. However, the Examiner takes Official Notice that thermally conductive metal coil-carriers are well known in the art and it would have been obvious to use a thermally conductive metal carrier for the inner sleeve of Trauernicht thereby guarding against potential damage due to overheating of the magnetic assembly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hayashi (US 5,027,412) teaches a conductive coil bobbin.

Tetzlaff (US 4,897,877) teaches a conductive coil bobbin.
